KeySafe Pro Permanent - Big Box high storage volume design with pushbuttons

Overview

KeySafe Pro Permanent Big Box provides convenient, managed access to stored keys. It can be used to allow quick and easy access to homes, offices, businesses or any other asset that requires entry through one or more keys. The code can be changed anytime for added security.

Available in black or clay.

A durable weather cover is included to prevent water intrusion and to hide out of sight.

Construction and installation

The KeySafe Pro Permanent Big Box is made of zinc alloy with a powder-coat finish. The KeySafe attaches securely to any wall or flat surface with 4 screws or anchors (not provided; type depending on wall material). Proper installation is important for security reasons.

Operation

Slide the 'Clear' switch down to reset the buttons.

Push the appropriate combination code.

Press down the 'Open' switch and remove the lid.

After use of the key, enter the code again, press down the 'Open' button and place the lid back.

Release the 'Open' button and the lid will be locked.

Applications

Remote sites, alarm & emergency entry, access to construction sites, medium security storage areas...

Guidelines

We recommend that your KeySafe is fitted in a covert position if at all possible.

When programming your access code, we recommend that you NEVER use a birth year or other obvious combination code. A combination consisting of between 5 and 7 digits is recommended.

We recommend that you fit your KeySafe to brickwork or concrete areas as opposed to wooden surfaces.

Please remember that KeySafe is a convenience product, not a security product.

Standard Features

- Easy-to-use key box
- Change combination as often as needed - 1024 different code combinations possible
- Large storage space
